EXECUTIVE SUMMARY

Senior Backend Engineer with 4.5 years of hands-on experience designing and building scalable microservices and RESTful APIs using TypeScript, NodeJS, and NestJS. Proven track record of optimizing PostgreSQL database queries and implementing asynchronous messaging queues with BullMQ and Redis in Dockerized environments.

WORK EXPERIENCE

Senior Backend Developer

Veloce Tech Solutions | 03/2023 - Present

- Architected and implemented 15+ core RESTful microservices using NestJS and TypeScript for an enterprise recruitment platform handling 100k daily active users.
- Designed PostgreSQL schema, optimized complex relational queries, and reduced query latency by 45% using efficient indexing and connection pooling.
- Integrated BullMQ with Redis to process asynchronous PDF resume parsing and AI text screening pipelines without blocking event loops.

Backend Developer

Fintech Nexus Vietnam | 09/2020 - 02/2023

- Developed robust payment processing APIs using NodeJS, Express, and PostgreSQL.
- Containerized backend services with Docker and Docker Compose for automated CI/CD deployments on AWS.
- Implemented unit and integration tests using Jest, achieving 85% test coverage across financial transaction services.
