Ta Van Minh

SENIOR EMBEDDED FIRMWARE ENGINEER

minh.tavan.embedded@gmail.com | +84 905 119 882 | Da Nang, Vietnam

PROFESSIONAL SUMMARY

Embedded Software Engineer with 4 years of experience programming microcontrollers, IoT hardware devices, and low-level firmware using C/C++, FreeRTOS, and Linux Kernel drivers. Expert in UART, SPI, and I2C hardware protocols. Completely unrelated to digital marketing or advertising.

CORE COMPETENCIES & SKILLS

C/C++ • Embedded Systems • FreeRTOS • ARM Cortex • IoT • Hardware Debugging • PCB Design • Linux

PROFESSIONAL EXPERIENCE

Firmware Engineer

SmartSensor IoT Technologies | 2021 - Present (4 years)

- Developed robust C/C++ firmware for smart metering devices connected via LoRaWAN protocol.
- Optimized power consumption on battery-operated microcontrollers, extending device battery life to 5 years.
- Debugged hardware protocols using oscilloscope and logic analyzers.

EDUCATION & CERTIFICATIONS

B.S. in Electrical and Electronics Engineering

Danang University of Science and Technology (2017 - 2021)

Certifications: Certified Embedded Systems Professional
